Here's what we mean by **ART**:

A We begin with **aligning** around the distinctions that describe Team Coaching. It illuminates the terrain we will be working and how we want to be together.

R We will **reveal** your relationship to team coaching, your practice, the coach you are and any limiting beliefs getting in your way. Exploding the myths and misconceptions commonly held about coaching and team coaching.

T You will be supported to **transform** and figure out new authentic choices for you, your practice and how you engage clients. You will be guided to translate these changes into highly targeted practical changes that translate into value for you and your clients.

An intimate space to illuminate best practice for Team Coaching globally

Our world continues to change, where change is ubiquitous and the concept of VUCA (volatile, uncertain, chaotic, ambiguous) is alive and real.

With the challenge of Hybrid and Remote working, economic and political turbulence, themes like the big resignation, belonging, D, I and E, Organisations are facing a myriad of complex and wicked problems. Questions about how to collaborate, innovate and remain relevant persist.

As Team Coaches, we need to work differently with all kinds of teams and deal with a myriad of challenges and wicked problems. So how do we, as Team Coaches, help our clients navigate the practical and psychological issues that arise as they manage these multiple complexities?

How do we take care of our own needs and continue to provide the depth and quality of coaching so needed in these times?

What can I expect?

- ✨ A depth of relationship with experienced coaches from around the globe who care about team coaching and the systems we belong to, including this one
- ✨ Exploring who you are in this system and therefore who you are as a Team Coach, appreciating and acknowledging difference
- ✨ A safe and restorative space to pause, connect and nurture yourself in the messiness and complexity of working with teams, and to stretch your own team coaching practice
- ✨ A safe place where we will encourage the highest standards for ourselves and others so we can learn

The Story So Far

We met during the Pandemic, on a course designed to move our respective businesses online. We forged an incredible bond recognising our respective desire to support others be with the seismic change we are all experiencing in the world.

The Pandemic may have subsided to become an endemic but other forces, Economic, Geo-political and Climate persist. This means the nature of change is ubiquitous and as uncertain as ever. Teams within Organisations need coaching to navigate this terrain. We have formed our own team to generate a compelling online Master Group Supervision Program for Team Coaches. We are calling this program "The ART of Team Coaching".
